AQUADIST

PRO SYSTEM AUTOCLAVES & AQUADIST

Pro System autoclaves (E8 to E10) offer high performance, user-friendly design, full connectivity, and expandable traceability, ensuring safety for dentists, assistants, and patients. Aquadist is a compact water distiller with a 4L capacity, producing 0.7L of distilled water per hour, meeting safety, low-voltage, and electromagnetic compatibility standards.

THERMOSEALING MACHINES

A wide range of thermosealing machines is offered to meet the needs of every dental practice. Whether rotary or manual, all thermosealers feature simple and versatile use. Additionally, Euroseal Valida and Euromatic provide validation, connectivity, and traceability.

STERILIZATION CONTROL

Sterifast provides a complete range of sterilization control tools, including the Bowie & Dick Test, Helix (PCD) Test, Type 6 (I6), Type 4 (I4), EO Indicator (E1), Biological Indicators, Seal Check, and the Label Gun & Indicator Label for efficient and traceable labeling.

All chemical indicators comply with ISO 11140 standards, are non-toxic and heavy metal-free, ensuring accurate sterilization monitoring and patient safety.

They offer traceability, reliability, and ease of use for daily sterilization quality assurance and documentation compliance.

PACKAGING SOLUTIONS

Sterifast offers a range of sterilization packaging for medical instruments: flat rolls, gusseted rolls, Tyvek rolls, and medical pouches. They come in blue, green, or transparent, with sterilization indicators for steam, ethylene oxide (E.O.), formaldehyde, or VH₂O₂. Custom sizes and expandable designs ensure proper fit, sterility, and protection of instruments, even for irregularly shaped items.

ALLE® MANUAL IRRIGATION LINE

A manual irrigation system with a flow control button keeps the implant site clean and cool, and is also suitable for irrigation during final implant fixation.

ALLE® SALINE SOLUTION

A sterile isotonic solution designed for surgical irrigation and cooling rotary instruments during procedures. Formulated to maintain extracellular osmotic balance, ensuring safe and effective use in surgical settings.

ALLE® MECHANICAL IRRIGATION LINES

A precise coolant jet keeps the dental drill at the ideal temperature, using irrigation systems tailored to each physiodispenser. Alle® silicone tips come in various sizes to fit different cooling needles.
